

SCAMMED AT A CRYPTO ATM?

YOU MAY BE ELIGIBLE FOR A REFUND.

Illinois residents lost nearly **\$190 MILLION** to crypto scams in 2025

A new Illinois law now provides protections for consumers when using digital asset kiosks ("crypto ATMs").

Crypto ATMs have become a favored tool for scammers because they make it easy to move money fast and anonymously.

Customers who are victims of fraud at a crypto ATM may qualify for refunds.

To be eligible, a consumer must:

- Be a victim of a scam conducted at a crypto ATM in Illinois;
- Tell the crypto ATM operator about the scam within **30 days**; and
- Provide the crypto ATM operator with a police report (or a complaint filed at a government agency) **within 60 days** of the scam.

Think you've been scammed? Contact the crypto ATM operator, file a police report, and [file a complaint with IDFPR](#).
