

ACCURATE DATA ENTRY IN THE APLD

The Anti-Predatory Lending Database program requires that all information entered in the database be true, correct and accurate. Suspect or incorrect data will be flagged and result in investigation and possible disciplinary action.

In particular, take note that FHA Streamline refinances are not exempt under Illinois law from the requirement to enter borrower income information. It is not acceptable to enter a nominal amount such as \$1.00 as borrower income. You must enter the borrower's actual income.
